The Fulbright Programme

The Fulbright programme of international educational exchange was an initiative of American Senator J. William Fulbright from Arkansas, who in the aftermath of World War II believed that mutual understanding between different countries and cultures was crucial to ensure a peaceful future for the world.

The Fulbright Act, an ingenious piece of legislation passed by the United States Congress in 1946, directed proceeds from the sale of surplus war property, foreign loan repayments and reparations to fund the “promotion of international good will through the exchange of students in the fields of education, culture, and science.”

In Senator Fulbright’s own words, the Fulbright programme aims “to bring a little more knowledge, a little more reason and a little more compassion into world affairs and thereby to increase the chance that nations will learn at last to live in peace and friendship.”

New Zealand was the fifth country to sign up to the Fulbright programme by bilateral treaty with the United States of America, in 1948. Since then Fulbright New Zealand has sent more than 1,400 New Zealand graduate students, artists, academics and professionals to the US and welcomed more than 1,100 Americans on exchanges here.

Fulbright New Zealand is jointly funded by the US and New Zealand governments with additional funding from award sponsors, private philanthropists and alumni donors. It is governed by a twelve member Board of Directors comprised of six New Zealanders and six Americans.

The Fulbright programme has been described as one of the largest and most significant movements of scholars across the face of the earth and now operates in over 155 countries, funding around 8,000 exchanges per year for participants to study, research, teach or present their work in another country.

The more than 300,000 Fulbright alumni worldwide include heads of state, cabinet ministers, ambassadors, politicians, judges, heads of corporations, university presidents, journalists, artists, professors and teachers.

Esteemed alumni of the Fulbright programme include Alan MacDiarmid, Dame Marie Clay, Sir Wallace Rowling, Allen Curnow, Dame Jean Herbison, Sir Kenneth Keith, C. K. Stead, Bill Manhire, James Belich, Michael King, Witi Ihimaera, David Cunliffe and many other significant New Zealanders.

Fulbright grantees make the most of their exchanges to get to know and understand a different country and culture, to advance themselves academically or professionally and to make lifelong friendships and professional relationships. Many look back on their Fulbright exchange as a life-changing experience and a defining moment of their career.

Messages of Congratulations

“The United States is one of our oldest and closest friends, but we have never taken that relationship for granted. While political and other high-level links are critical to the relationship continuing to grow and evolve, of equal importance are personal links that build on our shared values. One of the longest standing initiatives that has helped sustain those links is the Fulbright Programme.

This year’s grantees will carry on a long tradition of excellence and relationship-building in their respective fields of endeavour, and I congratulate them, their families, and their teachers on receiving this prestigious honour. We commend your achievements, and wish you all the best for your Fulbright exchanges. Most importantly, we look forward to your future contributions to the continuing growth of NZ-US relations.”

Hon Murray McCully
Minister of Foreign Affairs, New Zealand
Honorary Chairperson, Fulbright New Zealand

“Congratulations to all of this year’s Kiwi and American Fulbright participants. The Fulbright program is the flagship of American academic exchanges, and your inclusion in the program is a testament to your excellence, imagination and dedication.

With the emphasis that the US Embassy is placing on both youth outreach and science/technology exchanges, it is my expectation that together we can position the Fulbright program as an even more powerful engine for bringing our two countries closer together. Senator Fulbright’s vision was founded on knowledge, reason, compassion, and friendship, and those keystones – if preserved and strengthened – will serve successive generations well as they step forward to lead our two countries.”

Hon David Huebner
US Ambassador to New Zealand
Honorary Chairperson, Fulbright New Zealand

“On behalf of Fulbright New Zealand’s Board of Directors, congratulations to all of this year’s grantees. It is our goal to continue growing New Zealand’s Fulbright programme in size and diversity, and we are happy to see that growth reflected in this year’s pool of talented grantees. We are proud to contribute in such a positive way to the bilateral relationship between New Zealand and the US, and in fields important to both countries, such as science and technology.

Fulbright New Zealand’s Board and staff work hard to make your Fulbright exchanges a success in all regards, and we trust you will do the same. We wish you the very best for your exchange activities, and are confident you will benefit greatly from them both professionally and personally.”

Barbara Johnson
Chairperson of the Board, Fulbright New Zealand

Robyn Whittaker

Robyn Whittaker from Whangaparaoa will research innovations in mobile health in the United States, at the Health Resources and Services Administration in Washington, DC.

Robyn is Programme Leader, Health Technology at the University of Auckland's Clinical Trials Research Unit.

“We must try and expand the boundaries of human wisdom, empathy and perception, and there is no way of doing that except through education.”

Senator J. William Fulbright
